

Understanding the Undefined Terms

Lesson Objective: I will be able to (INBAT) name and identify undefined terms and the geometric figures they create

Naming Points, Lines, and Planes

<u>Point</u>		point point A
<u>Line</u>		line AB line BA $\overleftrightarrow{AB}$ $\overleftrightarrow{BA}$ line ℓ
<u>Plane</u>		plane ABC (use 3 points plane M not on same line)

Collinear:

on the same line

Coplanar:

on the same plane

Examples:

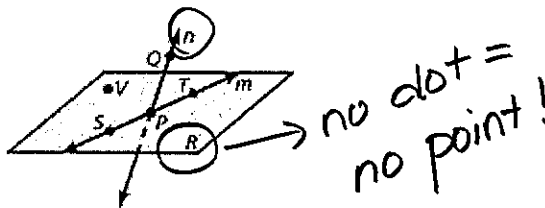

1. Give 2 other names for $\overleftrightarrow{PQ}$ and plane R.

$\overleftrightarrow{QP}$, line n } plane SPV
plane STU

2. Name 3 points that are collinear and 3 points that are coplanar.

$\downarrow$
S, P, T

$\downarrow$
S, P, T... VPT... SVT...

Using I

The def

notes will
be completed
on Thursday!

can be described using words such as: _____ or _____
