HW #7-4: Quiz Review

1. Draw an example of a concave polygon.
2. Draw an example of a convex polygon.

3. Draw an example of a regular polygon.
4. Find the value of x .

5. Find the measure of each interior and exterior angle of a regular 15-gon.

6. Find the indicated measure in $\parallel$ -gram ABCD.

- a. $CD =$ _____
- b. $BD =$ _____
- c. $m\angle ABC =$ _____
- d. $m\angle DBC =$ _____

7. State the theorem (or describe it in “if $\rightarrow$ then” form) that you can use to prove the quadrilateral is a $\parallel$ -gram, if possible.

8. A park in the shape of quadrilateral PQRS is bordered by 4 sidewalks. Find the measure of each exterior angle of the park.

9. Complete the proof:

Given: $\angle 1 \cong \angle RST$ and $\angle 2 \cong \angle 3$

Prove: RSTV is a parallelogram.

Statements	Reasons

10. A convex polygon's interior angles have a sum of 2520° . How many sides does the polygon have? Then name the polygon by the number of its sides.

11. WXYZ is a parallelogram. Find each measure.

- a. $WX =$ _____

- b. $YZ =$ _____

- c. $m\angle X =$ _____

- d. $m\angle W =$ _____

12. Determine if each quadrilateral must be a parallelogram. Justify your answer.

- a.

- b.

- C.
