HW #6-5

Try doing these on your own with just the hint in italics given.

If you need additional help, refer to the links that are posted on the classroom calendar for these constructions.

1. Construct the 3 medians of this triangle. The point of concurrency is called the _____.

*Use the construction for the
perpendicular bisectors, but use
only the midpoint...*

2. Construct the 3 altitudes of this triangle. The point of concurrency is called the _____.

*Use the construction for a
perpendicular line through a
point not on that line...*
